

Paris, December 21, 2018

PRESS RELEASE

LINAGORA, the french Open Source key-player, is very pleased to introduce the latest version of LinTO, a Smart Open Source Assistant, at CES 2019.

LinTO is a free and Open Source Smart Voice Assistant, designed by LINAGORA

LinTO is designed to understand your voice, and help your company to improve its productivity throughout the entire day, and especially during meetings.

All source code is available, it's free and will always be. Available here : linto.ai

Privacy, customization, and openness are the key features of LinTO.

You can deploy LinTO in your own infrastructure and the Speech To Text is processed locally without any data going to the cloud. It is GAFAM-free, and respects your privacy. Your data never leaves your IT system and can't be steel for commercial use.

LinTO is based on a hardware and software Open Source Platform : we can extend the core features set to fit customers business needs.

You can create all the commands you need. For example, LinTO can interact with OpenPaaS, LINAGORA's Open Source collaborative platform, to manage your business meetings, IOT devices, e-mails, automated transcriptions and much more.

LinTO is smart, it knows your use cases and can be trained with business-aware lexical.

LinTO is EU GDPR Compliant, and multilingual (French, English and more languages will come soon).

Since last CES, LinTO has not only evolved from a design, software and material standpoint, but it is also currently engaged in pilot projects with major French banks and institutions (EDF, Air France, Société Générale...)

The form factor has changed and is closer to its most definitive form. The core software has also evolved a lot.

LINAGORA's secret tip - its new extension open source board - will be shown. This board extends a Raspberry Pi compute module functionalities and makes it a true audio processing device.

At the CES 2019, come and meet Alexandre Zapolsky (President and co-Founder), Michel-Marie Maudet (General Manager and co-Founder), and Michaël Bailly (Product Owner), to see a public demonstration of LinTO !

Where : CES, Eureka Park Las Vegas
Stand : Level 1 Hall G num. 50819

When : from 8 to 12 January, 2019
